

Customer Profile

**TWMA improves operational visibility with C-SAM OPS Asset Management**

**About the company**

TWMA are a leading waste management solutions provider for the oil and gas industry, dealing with drilling waste and other associated oil industry waste, providing both offshore and onshore solutions. TWMA aids organisations in reducing the environmental impact of waste from exploration to decommissioning, ensuring their clients meet current and future legislation. The organisation employs over 350 employees across 11 regional offices in Europe, Africa, America and the Middle East.

**Challenges**

- Replace disparate information silos and legacy systems with a globally integrated solution
- Improve the transparency, efficiency and effectiveness of asset and materials tracking
- Provide management with actionable information when and where it is needed
- Aid in integrating and defining operational processes to accommodate global growth

**Benefits**

- Provides a 360 degree view of current operations across the globe
- Increased productivity and continuity of work by integrating and standardising business processes
- Control and insights into current and future equipment certification and employee training requirements

**Solutions**

- Product Implemented: C-SAM OPS
- Key Functions: Asset Management, Customer Management, Human Resources and Logistics, Procurement and Inventory Management
- Integrated with: Microsoft Navision (Financials)

*Operations Manager Ally Parker comments; "C-SAM OPS helps to provide a single, accurate view of our business, enabling us to track and trace vital information across our global operations."*
